

LIST OF FIGURES

Figure No.	Title	Page No.
f-1	R. Buckminster Fuller and David Blume	i
0-1	Postcard from Edward Abbey	1
0-2	"Guess what just blew in from Washington" Michael Keefe	2
0-3	"Strike a blow for victory!" Matt Wuerker	6
1-1	Farm alcohol tractors	9
1-2	Spark advance lever	12
1-3	Seagram alcohol tractor	13
1-4	Jack Dalley with a Henry Ford tractor	13
1-5	World map of developed and potential petroleum reserves, 1919	15
1-6	1936 alcohol advertisement in England	16
1-7	Illustration in pamphlet circulated in 1933 by the Iowa Petroleum Council	17
1-8	Annual cost of petroleum imports	18
1-9	"Fast rising oil prices" Guemsey Le Pelfey	19
1-10	"Golly Dad we really bought it?!" Matt Wuerker	20
2-1	"Public investment/wasteful subsidy" Andrew B. Singer	23
2-2	"New George Bush national parks" Mike Peters	24
2-3	Sugar plant generator	25
2-4	Boilers burning bagasse	25
2-5	Blessed by agriculture; percent of U.S. land in agriculture	26
2-6	Percent of U.S. agricultural land in corn	27
2-7	Who needs OPEC?; alcohol production from selected feedstocks	27
2-8	Uses of U.S. corn	31
2-9	"Public transit wastes money" Andrew B. Singer	32
2-10	World petroleum reserves	33
2-11	Actual and projected motor vehicle petroleum use	36
2-12	World vehicle registrations	36
2-13	[Earth roast] Andrew B. Singer	38
3-1	"America's gas for food program" Mike Peters	39
3-2	Photosaturation	40
3-3	Solar saturation in sugarcane; photosynthesis and light intensity	41
3-4	Where oil originates and who consumes it	41
3-5	Permaculture production system	44
3-6	"Sam, your transportation arteries are badly clogged" Andrew B. Singer	45
3-7	"Alcohol, the solar fuel" Ron Harper	46
3-8	Control group, plantings without DDGS	47
3-9	Plantings with DDGS	47
3-10	Corn DDGS fertilizer value; comparison between corn DDGS fertilizer value and recommended fertilizer levels for 160 bushels/acre yield	48
3-11	Improved growth of corn using DDGS	49

Figure No.	Title	Page No.
4-1	"The world runs on oil ... shouldn't oilmen run the world?" Matt Wuerker	51
4-2	"See if it rides any smoother now!" Michael Keefe	52
4-3	Deep tar sands extraction	53
4-4	Years of supply of fossil fuels	53
4-5	U.S crude oil imports by country	54
4-6	"How to develop western energy resources" Michael Keefe	55
4-7	Act of a terrorist in the U.S.?	57
4-8	Four Corners coal strip mine land	57
4-9	Nuclear transportation accident	59
4-10	"He's grown a foot since I saw him last" Mike Peters	60
4-11	"So what's wrong with releasing harmless amounts of krypton gas...? Mike Peters"	60
4-12	"The price of oil" Andrew B. Singer	61
4-13	"I told you not to go on that Easter egg hunt near the nuclear plant!" Michael Keefe	62
4-14	Individual fuel cell	63
4-15	Overview of the transition to the hydrogen economy	64
4-16	Hydrogen fuel cell	65
4-17	"These hydrogen fuel cell cars are entirely pollution free!" Andrew B. Singer	66
4-18	"You want coal? We own the mines" Mike Peters	68
5-1	Gas pump hydrometer	69
5-2	"We must stop teenagers from smoking!" Andrew B. Singer	71
5-3	Alcohol pumps in Brazil	72
5-4	First dedicated alcohol aircraft	73
5-5	Brazilian Flexpower	74
6-1	"Oh boy, honey! More free feedstock!" Ron Harper	77
6-2	Alcohol yield per ton of feedstock	78
6-3	Alcohol yield per acre of feedstock	79
6-4	"Say Max, I found this station that's open 24 hours" Ken Alexander	80
6-5	"This land is your land, this land is my land" Mike Peters	81
6-6	"At last ... the big car makers confront global warming" Andrew B. Singer	82
7-1	Enzymes at work	83
7-2	Saccharometer and refractometer	84
7-3	Small juice press	85
7-4	Small cane crusher	86
7-5	"Excuse me, this section is <i>diffusion</i> , not <i>confusion</i> !" Ron Harper	86
7-6	"What's the matter with Ansel?" Michael Keefe	87
7-7	Refractometer	90
7-8	Sugar testing	91
7-9	Litmus paper	92
7-10	pH meter	92
7-11	The pH of common materials	93
7-12	Iodine test	95
7-13	Starch recipe model	96
7-14	Gelatinized corn	97
7-15	Starch recipe materials	97
7-16	Liquefied corn	99
7-17	Batch cooking of dried sago	100
7-18	Batch cooking of fresh cassava	101
7-19	Starch cooking flow diagram	102
7-20	Fermentation cooling coil	103
7-21	Effect of nutrients on fermentation rate	104

Figure No.	Title	Page No.
7-22	First stages of fermentation	105
7-23	Structure of yeast	106
7-24	Bacteria-infested mash	106
7-25	Fermentation lock	107
7-26	Magnified yeast	107
7-27	Fermentation rate at two temperatures	108
7-28	Yeast reproduction	109
7-29	Yeast breeder	109
7-30	Fermentation tank	110
7-31	Semi-continuous starch cooking, fresh cassava	113
7-32	Net cooking energy consumed (in megajoules per liter)	114
7-33	Sprouting barley	115
7-34	Small farm-scale dehydrator	115
7-35	Minimum safety equipment	116
7-36	"Oh yeah ... It's 'Always add acid to water'" Ron Harper	116
7-37	"Bush faces the Iraq threat & the global warming threat" Andrew B. Singer	117
7-38	"The thirst for gas" Ken Alexander	118
8-1	Turbo Klein variety fodder beets	119
8-2	Young buffalo gourd plant	120
8-3	Buffalo gourd mature fruits	121
8-4	Buffalo gourd canopy	121
8-5	Mature cassava root	122
8-6	Cassava	123
8-7	Effect of particle size on efficiency of cassava fermentation	124
8-8	Analysis of fresh cassava roots	124
8-9	Castor beans	125
8-10	Comparison of wild and wastewater-grown cattails	126
8-11	Cattail experiment	126
8-12	Cattails, mature foliage	127
8-13	Cattail rhizomes	128
8-14	Experimental solar vacuum still	128
8-15	Scanning electron micrograph of <i>Zymomonas mobilis</i>	129
8-16	USDA researcher Nancy Ho	132
8-17	<i>Zymomonas mobilis</i>	132
8-18	Removing solvent	134
8-19	"We have models that are getting 60 miles to the gallon" Phil Frank	136
8-20	[Uncle Sam sitting by empty gas pump] Michael Keefe	139
8-21	"Good morning, sir ... We're a Libyan hit squad touring America" Michael Keefe	140
8-22	"It's part combustion engine, part electric and part sugar beet" Phil Frank	141
8-23	Fodder beet harvesting	144
8-24	"It's a Russian hybrid—a Borscht Boxster. Climb in!" Phil Frank	145
8-25	"Well ... we were looking for some tall, wild grass..." Ron Harper	146
8-26	Freshly dug Jerusalem artichoke tubers	147
8-27	Flowering Jerusalem artichokes	147
8-28	Processing Jerusalem artichokes	148
8-29	Jerusalem artichokes, mature tubers	148
8-30	Sunflower beetle damage	149
8-31	Comparison of three inulin-fermenting yeast	150
8-32	"Hey you! Aint you heard of patriotism?" Michael Keefe	151
8-33	Cultivated kelp	153
8-34	Modern net cultivation of kelp	154

Figure No.	Title	Page No.
8-35	River of nitrogen	154
8-36	Suffocating stretch (dead zone)	155
8-37	Marine algae pond	156
8-38	Wild mesquite tree	157
8-39	Mesquite flowers	158
8-40	"Baba's parked his new hybrid in front of Caffe Caffeine" Phil Frank	159
8-41	Nipa palm fruit	160
8-42	Nipa palm trees growing right along brackish shores	161
8-43	Nipa palm roofing	162
8-44	Pimelons	163
8-45	Prickly pear	163
8-46	"Let me know if you see a prickly pair out here..." Ron Harper	164
8-47	Tropical sugar beet	165
8-48	Sugar beet harvester	165
8-49	Sugarcane	166
8-50	Sugarcane seedlings	166
8-51	Manual sugarcane harvesting	167
8-52	Mechanical harvesting of sugarcane	167
8-53	Solar saturation in sugarcane	168
8-54	Sugarcane root system	168
8-55	Vinasse fertilization	169
8-56	Sweet potatoes	169
8-57	Tilby Separator system	170
8-58	Typical sugarcane billet	171
8-59	Tilby strandboard	172
8-60	Modular building panels	172
8-61	Sweet sorghum spacing	172
8-62	"That's odd ... They're cooked already..." Mike Peters	174
8-63	"Baba gives a couple of vegans a tour of his new 'Borscht Boxster'" Phil Frank	175
8-64	"No Whey! Whey!" Mike Peters	178
9-1	<i>Mother Earth News</i> ' hot-oil furnace/distillery	185
9-2	Latent heat of vaporization	186
9-3	"What do you want to be if you grow up?" Michael Keefe	188
9-4	Cutaway of hot-oil furnace	189
9-5	Heating with hot oil	190
9-6	Jacketed tank	190
9-7	Cutaway view of jacketed tank	190
9-8	One complete distillation	191
9-9	Practical boiling points	191
9-10	Simple doubler still	192
9-11	Enrichment	192
9-12	Bubble cap distillery model	193
9-13	Bubble cap plate design	193
9-14	Countercurrent flow	194
9-15	Bronze wool packing	195
9-16	Pall ring packing	195
9-17	Lathe chip packing	195
9-18	Height-to-diameter ratio for packed columns	196
9-19	Matching tank size to column size	197
9-20	Liberator 925 six-inch distillery	198
9-21	Coil rolling tool	199

Figure No.	Title	Page No.
9-22	Temperature-sensitive flow-control valve	200
9-23	Installation of coolant flow-control valve	200
9-24	Cooling coil flow-control valve for six- to 12-inch column	200
9-25	Pressure gauge	201
9-26	Generic wood-fired distillery	201
9-27	Packed column laboratory distillery	202
9-28	Proof and Traill hydrometer	203
9-29	Liberator 925 control panel	203
9-30	Control coil construction	205
9-31	Cutaway through bushing	206
9-32	Perforated plate	207
9-33	Immersion coil heat exchanger	207
9-34	Weir dam perforated plate distillery	208
9-35	"It's just a microclimatic trend" Andrew B. Singer	209
9-36	Vacuum and boiling points	210
9-37	A one-inch square column of air...	211
9-38	Earl Webb	212
9-39	Earl Webb's mobile vacuum distillery	212
9-40	Basic vacuum distillery	213
9-41	Vacuum pump and alcohol receiver	214
9-42	Filling port for small vacuum still	215
9-43	Cutaway view of vacuum distillery	215
9-44	"Our technological utopia" Andrew B. Singer	216
9-45	Fuel oil tank distillery	217
9-46	"Trickle down economics" Matt Wuerker	218
9-47	"A homemade heat pump" Ron Harper	219
9-48	Firebox construction	220
9-49	Firebrick-lined door	220
9-50	Small Brazilian wood-fired distillery	221
9-51	Rocket still	221
9-52	Liberator 925 firebox	222
9-53	Squirrel cage fan	222
9-54	David Ange's distillery	223
9-55	Firebox door	223
9-56	Walter Wendt's personal still	224
9-57	"The axles of evil" Khalil Bendib	225
9-58	Energy for distillation	226
9-59	Corn grit alcohol dehydration unit	227
9-60	Splitting a column	229
9-61	"Happy coincidences!" Matt Wuerker	230
10-1	Three Meter Island cooling tower	231
10-2	Fermentation lock valve	232
10-3	Hatch closure	232
10-4	Top view of hatch	233
10-5	Plant layout	234
10-6	Cooling tower	235
10-7	Feedstock elevator	236
10-8	Floyd Butterfield's plant	238
10-9	Hammermill shredder	239
10-10	Hammermill conveyor and delivery chute	240
10-11	500-gallon plastic tank	241

Figure No.	Title	Page No.
10-12	1000-gallon tank	242
10-13	Spherical tank	242
10-14	Cone bottom fermentation tank	243
10-15	Gallons in a tank	243
10-16	Stainless steel tank head	244
10-17	Two-inch gate valve	245
10-18	Three-inch tank drain and valve	245
10-19	Common thermometer	245
10-20	Sight tube construction	246
10-21	Clamp-on tank mixer	247
10-22	Standard milk cooler agitator	248
10-23	Belt tensioner	248
10-24	Chain drive	248
10-25	Vertical tank agitation	249
10-26	Agitation in horizontal tanks	249
10-27	Nine-inch-wide auger used as an agitator	250
10-28	Direct drive coupler	251
10-29	Two-inch centrifugal pump	251
10-30	Centrifugal and diaphragm pumps	252
10-31	Three-inch single-diaphragm pump	252
10-32	2000 Moyno progressive cavity pump	253
10-33	Two-inch hose versus three-inch hose	253
10-34	Compressed-air-driven pump	254
10-35	Pump cart	255
10-36	Three-inch to two-inch quick-release reducing coupler	256
10-37	Three-inch versus two-inch quick-release fittings	256
10-38	Chuck Bondi's plant	257
10-39	Camlock-type quick-release mash line fittings	257
10-40	Cartridge-type water filter	258
10-41	Line strainer	258
10-42	Traditional condenser/counterflow condenser	259
10-43	Heat exchanger half-section	259
10-44	Tube-in-tube heat exchanger	260
10-45	Insulation for hot water lines	261
10-46	Counterflow heat exchanger end detail	261
10-47	Pin-lug and camlock fittings	262
10-48	Cooling coil	262
10-49	Cutaway through bushing model	263
10-50	Grain dryer	263
10-51	Shaker table	264
10-52	Mash dewatering	264
10-53	Apple washer	265
10-54	Feed chute	266
10-55	Pond-style methane digester	267
10-56	Compact pond-type digester	267
10-57	Underground fuel tank	268
10-58	Flashpoints and fire points of alcohol/water mixtures	269
10-59	Above-ground fuel storage, suction system	269
10-60	Oil spills/alcohol spills	270
10-61	Typical conservation vent	270
10-62	Modern conservation vent	270

Figure No.	Title	Page No.
10-63	Bulk storage of fuel	271
10-64	Enclosed indoor fuel tank	272
10-65	Thousand-gallon ladder tank	272
10-66	Manual fuel pump	273
10-67	Ventilated fuel storage shed	273
10-68	Safety cap for filling 55-gallon drums	273
10-69	Fire sprinkler assembly detail	274
10-70	Home fuel tank	274
11-1	"Suicide/freedom" Andrew B. Singer	277
11-2	Corn distiller's feed nutrient composition	279
11-3	Wheat and wheat DDG	280
11-4	"I wonder if there's intelligent life on other planets?" Khalil Bendib	282
11-5	Composition of solids and solubles in grain mash	284
11-6	Stillage transport	284
11-7	Stillage field-spreading	284
11-8	Composting with stillage	285
11-9	Spraying compost with stillage	285
11-10	Making windrows	285
11-11	Oyster mushrooms	286
11-12	"Washington regulations! Washington interference!" Michael Keefe	287
11-13	Mature tilapia	289
11-14	Small fry	290
11-15	Duckweed	290
11-16	Chive beds	291
11-17	"Why don't you stop killing people with your second-hand smoke?" Andrew B. Singer	293
11-18	"There, are you happy now, OPEC?" Khalil Bendib	295
11-19	[George Bush's energy policy] Khalil Bendib	296
11-20	Methane digester in India	297
11-21	Farm-scale carbon dioxide compressor	299
11-22	English cucumbers	300
11-23	Greenhouse butter lettuce	300
11-24	Carbon dioxide storage	301
11-25	T-tape drip irrigation	303
11-26	T-tape interior	303
11-27	Markets for CO ₂	304
11-28	Single-cell protein farm	305
11-29	Radiant heat tubing	307
12-1	Greenhouse cucumbers, grown under optimal conditions of elevated carbon dioxide and warm temperatures	311
12-2	"...Our objectives in the region are therefore very clear" Khalil Bendib	313
12-3	<i>Agrocybe aegerita</i>	314
12-4	Organic insect control	317
12-5	Greenhouse lettuce at Archer Daniels Midland	318
12-6	Small model farm material and energy flow	319
12-7	Micro-scale alcohol plant income	320
12-8	Utah Phillips	322
13-1	"Pa, feller down there says he's [California Governor] Jerry Brown" Ken Alexander	325
13-2	Orrie Swayze	326
13-3	"Every time you fill your gas tank" Andrew B. Singer	328
13-4	E-50 emissions test in unmodified vehicles	330
13-5	Japy vaporizing alcohol carburetor	331

Figure No.	Title	Page No.
13-6	Martha vaporizing alcohol carburetor	331
13-7	Sankey diagram of a vapor alcohol engine	332
13-8	Vaporized fuel injection	332
13-9	CO emissions of vaporized versus liquid ethanol	333
13-10	Mercedes Benz alcohol vaporizer	334
13-11	Mercedes Benz vapor alcohol engine diagram	334
13-12	Gordon Cooper and Bill Paynter, March 15, 1981	336
13-13	Plane running on E-100	336
13-14	Dedicated alcohol high-horsepower airplane	337
13-15	Cold-start tank for planes	337
13-16	Henrietta Obueh of Nigeria, cooking with alcohol	340
13-17	Alcohol marine range	341
13-18	James McMurtry	342
14-1	Alcohol and gasoline fires	343
14-2	Energy losses from gasoline	344
14-3	Properties of gasoline, ethanol, and methanol	345
14-4	The four-stroke cycle	346
14-5	Chainsaw combustion chamber	347
14-6	Los Angeles, a day with clean air	349
14-7	Los Angeles, a day with not-so-clean air	349
14-8	Pinging	351
14-9	Energy content versus efficiency	352
14-10	Consumer automotive buying preferences	352
14-11	Carburetor corrosion	354
14-12	Fuel pump intake filter	355
14-13	Plugged sock filter	356
14-14	Fuel compatibility among water, ethanol, and gasoline	357
14-15	Phase separation	357
14-16	Preignition	359
14-17	"Use this planet?" Dan O'Neill	361
14-18	"Drive to work/work to drive" #1 Andrew B. Singer	362
15-1	Cutaway carburetor	363
15-2	[Witches mixing gas and air] Frank Cieciorka	364
15-3	Carburetor components	364
15-4	Single-barrel carburetor	365
15-5	Main jet removed	366
15-6	Pin vise and number drills	366
15-7	Decimal equivalent sizes of the letter drills	367
15-8	Decimal equivalent sizes of the number drills	367
15-9	Exhaust gas temperature gauge	367
15-10	Exhaust gas temperature sensor	367
15-11	Diameter versus area	368
15-12	Automotive analyzer	369
15-13	Idle mixture needle	369
15-14	Vacuum gauge	370
15-15	Manifold puddling	371
15-16	Two-barrel carburetor accelerator pump jets	371
15-17	Carburetor troubleshooting chart	371
15-18	Single-barrel carburetor accelerator circuit jet	372
15-19	One-barrel carburetor power valve assembly	372
15-20	Power valve actuator	373

Figure No.	Title	Page No.
15-21	Twin main jets and power valve	373
15-22	Carburetor float materials	374
15-23	Carburetor float assembly	374
15-24	"It's a 4,000 gallon tank but I only keep 2,000 in it" Ken Alexander	375
15-25	"Well, try to think ... Did you order a 50 billion dollar pipeline from Alaska?" Michael Keefe	376
16-1	Mass air tuner	377
16-2	"We bought a George Bush action figure" Mike Peters	378
16-3	Stoichiometric air/fuel ratio of gasoline	380
16-4	Oxygen sensor with fins	380
16-5	Basic fuel injection system	381
16-6	L-Jetronic fuel injection system	382
16-7	Fuel pressure regulator	383
16-8	Constant injection system	384
16-9	CIS line pressure regulator	385
16-10	Air flow control fuel injection air sensor	386
16-11	Brazilian fooler	387
16-12	Oxygen sensor voltage curve	388
16-13	Oxygen sensor fooler	389
16-14	Software control panel for hacking a car's computer	390
17-1	General Motors Brazilian cold-start system	391
17-2	Ether or propane cold-start	392
17-3	Cutaway model of PCV-type cold-start fuel injector	393
17-4	Commercial ether start system	393
17-5	Propane cold-start system model	394
17-6	Non-electric thermostatic valve	395
17-7	Liquid fuel cold-start system	396
17-8	Liquid fuel cold-start with a mechanical fuel pump	396
17-9	Motorcycle cold-start system	397
17-10	"Iraq: <i>not</i> another Vietnam!" Khalil Bendib	398
18-1	Distributor	399
18-2	Basic distributor	400
18-3	Model A "digital" distributor	400
18-4	Ignition timing	401
18-5	Adjusting the timing	402
18-6	Various distributor hold-down brackets	402
18-7	Keeping things straight	402
18-8	Aftermarket knock detector	403
18-9	Deactivating the vacuum advance	403
18-10	Electronic timing advance	404
18-11	Knock sensor	405
18-12	"Dollars per gallon, dead per gallon..." Matt Wuerker	406
19-1	Equal-feeding manifolds	407
19-2	Preferred fuel heater for carburetors	408
19-3	Oil filter adapter	409
19-4	Counterflow fuel heater	410
19-5	Air heating for carburetors	410
19-6	Air heater	411
